# DETAILS

## Agriculture Today: New Era of Prosperity or Temporary Opportunity?

The decade of the 2020s will be one of economic and financial divide. Of course, early in the decade, some have found a new era of prosperity, particularly with the grain industry. The low value of the dollar coupled with China rebuilding its protein sector and mother nature's influence on the market has brought a round of prosperity. Is this one-off profits? What about the livestock sector and others in the agricultural industry positioning to capitalize on opportunities? Regardless, what will be the new mega trends, business, and financial management characteristics to manage through the economic cycles? Dr. Kohl will use his five decades of business, academic experience, and wisdom to provide unique perspectives to lifelong learners.
